

Broadcasting Decision CRTC 2005-581

Ottawa, 7 December 2005

Northern Native Broadcasting, Yukon
Destruction Bay, Yukon Territory

Application 2005-1219-6

CHON-FM Whitehorse, Yukon Territory and its transmitter VF2147 Destruction Bay – Technical change

1. The Commission **approves** the application by Northern Native Broadcasting, Yukon to change the authorized contours of its transmitter VF2147 Destruction Bay, by increasing the effective radiated power from 2 watts to 10 watts.
2. The Commission notes that there will be no significant change to the authorized contours.
3. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
4. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.
5. Given that the technical parameters approved in this decision are for a low-power unprotected FM service, the Commission also reminds the licensee that it will have to select another frequency if the Department so requires.
