

Broadcasting Decision CRTC 2006-312

Ottawa, 24 July 2006

Campbellford Area Radio Association
Campbellford and Madoc, Ontario

Application 2006-0503-2

Broadcasting Public Notice CRTC 2006-67

29 May 2006

CKOL-FM Campbellford – New transmitter at Madoc

1. The Commission **approves** the application by Campbellford Area Radio Association to amend the broadcasting licence for the Type B community radio programming undertaking CKOL-FM Campbellford, in order to operate a low-power transmitter at Madoc.
2. The new transmitter will operate at 100.7 MHz (channel 264LP) with an effective radiated power of 49.3 watts.
3. The Commission did not receive any interventions in connection with this application.
4. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
5. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.
6. Given that the technical parameters approved in this decision are for a low-power unprotected FM service, the Commission also reminds the licensee that it will have to select another frequency if the Department so requires.

7. The transmitter must be operational at the earliest possible date and in any event no later than 24 months from the date of this decision, unless a request for an extension of time is approved by the Commission before 24 July 2008. In order to ensure that such a request is processed in a timely manner, it should be submitted in writing at least 60 days before that date.

Secretary General

This decision is to be appended to the licence. It is available in alternative format upon request, and may also be examined in PDF format or in HTML at the following Internet site: <http://www.crtc.gc.ca>
