Broadcasting Decision CRTC 2007-71

Ottawa, 23 February 2007

Durham Radio Inc.

Oshawa, Ontario

Application 2006-1109-7 Broadcasting Public Notice CRTC 2006-122 27 September 2006

CKDO Oshawa and its transmitter CKDO-FM-1 Oshawa – Technical change

- 1. The Commission **approves** the application by Durham Radio Inc. (Durham) to change the authorized contours of the transmitter CKDO-FM-1 Oshawa, by increasing the effective radiated power (ERP) from 250 watts to an average ERP of 665 watts (maximum ERP of 2,000 watts).
- 2. The licensee indicated that the proposed change would improve the reception of CKDO-FM-1 Oshawa, optimize the use of frequency 107.7 MHz (channel 299A) by counteracting co-channel interference from U.S. station WLKK-FM Weathersfield, New York, and continue the turnaround of CKDO from both a listener acceptance and a financial standpoint.
- 3. The Commission notes that the proposed technical change will result in a significant increase in the authorized contours of the transmitter.
- 4. The Commission received interventions in support of this application.
- 5. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
- 6. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.
