

Broadcasting Decision CRTC 2008-110

Ottawa, 21 May 2008

Larche Communications Inc.
Orillia, Ontario

Application 2008-0352-9, received 4 March 2008
Broadcasting Public Notice CRTC 2008-25
26 March 2008

CICX-FM Orillia – Technical changes

1. The Commission **approves** the application by Larche Communications Inc.¹ to change the authorized contours of the English-language commercial radio programming undertaking CICX-FM Orillia, by decreasing the average effective radiated power from 43,000 watts to 10,600 watts, by increasing the effective antenna height and by relocating the antenna.
2. The licensee proposed to move the transmitter from its current location to a new site approximately 10 kilometres west, where the transmission facilities of the licensee's other radio station are located. The licensee indicated that this change in the location of the transmitter would result in considerable cost savings and efficiencies.
3. The Commission did not receive any interventions in connection with this application.
4. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department of Industry notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.

Secretary General
