Broadcasting Decision CRTC 2010-83

Route reference: 2009-758

Ottawa, 12 February 2010

Rogers Broadcasting Limited
Vancouver, British Columbia

Application 2009-1538-2, received 10 November 2009

CHNM-DT Vancouver – Technical change

1. The Commission **approves** the application by Rogers Broadcasting Limited (Rogers) to change the authorized contours of the digital transitional television programming undertaking CHNM-DT Vancouver by increasing the average effective radiated power (ERP) from 772 watts to 4,300 watts (the maximum ERP will increase from 1,354 watts to 8,300 watts), by increasing the effective height of antenna above average terrain from 615 meters to 670 meters, and by relocating the antenna. There were no interventions to this application. The implementation is subject to the notification by the Department of Industry (the Department) discussed in paragraph 3 below.

2. The licensee stated that the proposed changes and the use of its own facilities will result in better signal quality for the station's Vancouver listeners.

Condition prior to the implementation of the new technical parameters

3. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met and that a broadcasting certificate will be issued. Therefore, in the absence of the notification by the Department, the licensee will not be able to implement the new technical parameters approved in this decision.

Other matters

4. In *Revised licensing framework for over-the-air digital television services*, Broadcasting Regulatory Policy 2010-69, 10 February 2010, the Commission revised the licensing framework for over-the-air digital television services. Rogers is encouraged to consult the policy and to file the necessary requests in order to have its digital transmitters authorized in accordance with the revised licensing framework.

Secretary General

This decision is to be appended to the licence. It is available in alternative format upon request and may also be examined in PDF format or in HTML at the following Internet site: http://www.crtc.gc.ca.
