

Broadcasting Decision CRTC 2005-115

Ottawa, 24 March 2005

Canadian Broadcasting Corporation
Regina and Yorkton, Saskatchewan

Application 2004-1017-6
Broadcasting Public Notice CRTC 2005-11
3 February 2005

CBK-FM Regina – New transmitter in Yorkton

1. The Commission **approves** the application by the Canadian Broadcasting Corporation to amend the broadcasting licence for the radio programming undertaking CBK-FM Regina, in order to operate a transmitter in Yorkton, Saskatchewan, to broadcast the programming of CBK-FM and serve the population of Yorkton.
2. The new transmitter will operate at 91.7 MHz (channel 219C1) with an effective radiated power of 57,000 watts.
3. The Commission received an intervention in support of this application.
4. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
5. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.
6. The transmitter must be operational at the earliest possible date and in any event no later than 24 months from the date of this decision, unless a request for an extension of time is approved by the Commission before 24 March 2007. In order to ensure that such a request is processed in a timely manner, it should be submitted in writing at least 60 days before this date.

Secretary General

This decision is to be appended to the licence. It is available in alternative format upon request, and may also be examined in PDF format or in HTML at the following Internet site: <http://www.crtc.gc.ca>
