Application No. 2004-1490-5

Application by **TELUS Communications Inc.** (TELUS) to amend the licences of its regional cable distribution undertakings in Alberta and British Columbia.

First, TELUS requests the authority to distribute the same Part 2 Eligible satellite services and Canadian distant signals on the same basis as the incumbent in the market, regardless of when the incumbent received its authorization to distribute the services or signals on that basis, and without the need for a further regulatory process. TELUS proposes the following condition of licence:

The licensee is authorized to distribute, as part of the basic service, any Part 2 eligible satellite service and any distant television station that is not a Part 2 eligible satellite service that is authorized for distribution as part of the basic service within its licensed area by any licensee.

Second, TELUS requests the authority to distribute the same ethnic audio programming services as the incumbent is authorized to distribute, regardless of when the incumbent received its authorization, and without the need for a further regulatory process. TELUS proposes the following condition of licence:

The licensee is authorized to distribute any audio programming service that is authorized for distribution within its licensed area by any licensee.

Third, TELUS requests that it be authorized to receive directly through its own broadband facilities, at its option, any of the Canadian signals set out in the Lists of Eligible Satellite services that are otherwise required to be received from a licensed Satellite Relay Distribution Undertaking (SRDU). TELUS proposes the following condition of licence:

The licensee is authorized to receive directly through its own facilities, at its option, any Canadian signals which are otherwise required to be received from a licensed SRDU.

Finally, TELUS requests that it be authorized to replace, at its option, any of its authorized U.S. 4+1 signals with the signal of a different affiliate of the same network located in the same time zone as that of the licensed area and received from a licensed SRDU. TELUS proposes the following condition of licence:

In addition to the services required or authorized to be distributed pursuant to the applicable section of the *Broadcasting Distribution Regulations*, the licensee is authorized, by condition of licence, to distribute, at its option and as part of either the basic service or its discretionary service, the signals of KOMO-TV (ABC), KIRO-TV (CBS), KING-TV (NBC), KCTS-TV (PBS) Seattle and KCPQ (FOX) Tacoma, or alternatively for each signal, the signal of a different affiliate of the same network located in the same time zone as that of the licensed area and received from a licensed SRDU.

5. **Vancouver, British Columbia**
Application No. 2005-0211-3

Application by **Corus Radio Company** (Corus) to renew the licence of the commercial radio programming undertaking CHMJ Vancouver, expiring 31 August 2005.

On 4 June 2004, the Commission issued Broadcasting Decision CRTC 2004-196 (Decision 2004-196) *Complaint regarding the broadcast of an episode of The Tom Leykis Show on radio station CHMJ Vancouver*. This decision was the result of a complaint from a radio listener regarding the content of a promotional spot and program identification message that aired on CHMJ during the 1 November 2002 broadcast of an episode of the U.S. syndicated radio program, *The Tom Leykis Show*. Based on its review of the logger tape of the program episode in question, the Commission found that Corus breached the prohibition against the broadcast of any abusive comment contained in the *Radio Regulations, 1986* and failed to meet a number of Canadian broadcasting policy objectives set out in the *Broadcasting Act*, including the high standard provision.

The Commission further noted in Decision 2004-196 that the licensee had ceased to broadcast the program.

The Commission required Corus, as part of its licence renewal application, to provide a report on the measures and mechanisms it has in place to ensure that the content of the programming on CHMJ adheres at all times to the Act and the Radio Regulations, as well as on the implementation and effectiveness of these measures and mechanisms.

In Broadcasting Decision CRTC 2005-101, 9 March 2005 (the decision) *Complaint regarding the broadcast of an episode of Loveline on CHMJ, Vancouver*, the Commission addressed a complaint regarding an episode of a U.S. syndicated radio program entitled *Loveline* that was broadcast by CHMJ. The episode was broadcast between 10:00 p.m. and midnight on 23 December 2002. The complainant requested that the Commission review the Canadian Broadcast Standards Council (CBSC) Decision 02/03-0459, 22 July 2003. The complaint was initially referred to the CBSC for resolution, since CHMJ is a CBSC member. Based on its review of the segment of the episode of *Loveline* at issue, the Commission found that, by broadcasting the episode, Corus failed to meet a number of Canadian broadcasting policy objectives set out in the *Broadcasting Act*, including the provision that provides that programming should be of high standard. The Commission found, however, that the licensee did not breach the provision contained in the *Radio Regulations, 1986* that prohibits the broadcast of any abusive comment.

As part of the current renewal application, the Commission received the report on the

measures and mechanisms that Corus has in place to ensure full compliance.

The licensee advised the Commission that CHMJ is now an all sports radio station.

6. **Tuktoyaktuk, Northwest Territories**
Application No. 2005-0529-0

Application by the **Canadian Broadcasting Corporation** to amend the licence of radio programming undertaking CHAK Inuvik, Northwest Territories.

The licensee proposes to add an AM transmitter at Tuktoyaktuk to broadcast the programming of CHAK Inuvik in order to serve the population of Tuktoyaktuk.

The transmitter would operate on frequency 1150 kHz with a transmitter power of 40 watts day-time and night-time.
