

## Broadcasting Decision CRTC 2006-273

Ottawa, 30 June 2006

**Radio 1540 Limited**  
Toronto, Ontario

*Application 2005-1571-0*  
*Broadcasting Public Notice CRTC 2006-52*  
*25 April 2006*

### **CHIN Toronto and its transmitter CHIN-1-FM Toronto – Technical change**

1. The Commission **approves** the application by Radio 1540 Limited to change the authorized contours of its transmitter CHIN-1-FM Toronto, by increasing the effective radiated power (ERP) from 35 watts to an average ERP of 161 watts, by decreasing the antenna height and by relocating the transmitter.
2. The licensee indicated that the proposed changes would improve the quality and coverage of the transmitter's signal in the Toronto area.
3. The Commission received interventions in support of this application.
4. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
5. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.

Secretary General
