#### **Application No. 2006-0029-8**

Application by the **Canadian Broadcasting Corporation** to amend the licence of the national, English-language, analog specialty programming undertaking known as Newsworld.

The licensee proposes to replace the condition of licence relating to the measurement of Canadian content which reads:

2. The licensee shall devote no less than 90% of the broadcast week to the distribution of Canadian programs.

For the purpose of this condition, “broadcast week” means seven consecutive broadcast days, beginning on Sunday.

with the following condition:

2. In each broadcast year, the licensee shall devote at least 90% of its programming to the distribution of Canadian programs during the broadcast day.

The licensee submits that the change in measurement of Canadian content is consistent with the Commission's approach to other analog specialty services, will allow it to create a 'deeper context' around international events to the benefit of its viewers and will not result in any change to the overall volume of Canadian content currently provided by Newsworld.
