Application by the **Canadian Broadcasting Corporation (CBC)** to amend the licence of the television programming undertaking CBNT St. John's, Newfoundland and Labrador.

The licensee proposes to add the TV transmitters CBNHT Hopedale, CBNMT Makkovik, CBNBT Nain and CBNPT Postville to broadcast the programming of CBNT St. John's.

The CBC presently holds a radiocommunication distribution undertaking (RDU) licence for the above-noted transmitters to broadcast the programming of the CBC Northern Television service received via satellite.

2. **Plaster Rock, New Brunswick**  
**Application No. 2007-0079-1**

Application by **Astral Media Radio Atlantic Inc.** (Astral) to amend the licence of the radio programming undertaking CIKX-FM Grand Falls, New Brunswick.

Astral proposes to convert its AM transmitter CJCJ-2 Plaster Rock to the FM band to broadcast the programming of CIKX-FM Grand Falls, in order to serve the population of Plaster Rock.

The transmitter would operate on frequency 91.7 MHz (channel 219LP) with an effective radiated power of 50 watts (non-directional antenna/antenna height of 25 metres).

According to Astral, the existing AM transmitter CJCJ-2 Plaster Rock is inefficient, worn-out and difficult to maintain. It also stated that the transmitter site is located in a low lying area. Consequently, the proposed FM transmitter requires relocation to an area which has elevation for line-of-sight coverage. Astral further stated that its sole concern is the quality of its signal and that the proposed coverage for the new FM transmitter is roughly the same as the current CJCJ-2 transmitter.

Astral is requesting permission to simulcast the programming of CIKX-FM Grand Falls on the new FM transmitter and on the AM transmitter CJCJ-2 Plaster Rock for a period of three months from the date of implementation of the new FM transmitter.

Astral is also requesting to amend the licence of CIKX-FM Grand Falls by deleting the AM transmitter CJCJ-2 Plaster Rock effective at the end of the simulcast period.

The licensee proposes to add an FM transmitter at Fontenelle to broadcast the programming of CJRG-FM Gaspé in order to adequately serve the population of Fontenelle.

The transmitter would operate on frequency 97.3 MHz (channel 247LP) with an effective radiated power of 43 watts (non-directional antenna/antenna height of 255.8 metres).

The licensee wishes to improve the signal quality of CJRG-FM Gaspé in part of its core market and indicates that the proposed contours of the new FM transmitter will remain within the authorized contours of CJRG-FM.

4. **Princeton, British Columbia**  
**Application No. 2007-0144-2**

Application by the **Canadian Broadcasting Corporation (CBC)** to amend the licence of the television programming undertaking CBUT Vancouver, British Columbia.

The licensee proposes to add the TV transmitter CBRG-TV Princeton to broadcast the programming of CBUT Vancouver.

The CBC presently holds a radiocommunication distribution undertaking (RDU) licence for the above-noted transmitter to broadcast the programming of the CBC affiliate CHBC-TV Kelowna, British Columbia.

In Broadcasting Decision CRTC 2005-80, dated 28 February 2005, the Commission approved an application by Global Communications Limited (now CanWest MediaWorks Inc.) to disaffiliate its station CHBC-TV from the CBC English-language television network.

In view of the above, the CBC has filed the above-noted application.

Should this application be approved by the Commission, the transmitter would be added to CBUT's licence and the above-noted RDU licence would be revoked.
