Broadcasting Decision CRTC 2008-91

Ottawa, 29 April 2008

Groupe Radio Antenne 6 inc.
Alma, Quebec

Application 2008-0280-3, received 21 February 2008
Broadcasting Public Notice CRTC 2008-20
10 March 2008

CKYK-FM Alma – New transmitter in Alma

1. The Commission **approves** the application by Groupe Radio Antenne 6 inc. (Antenne 6) to amend the broadcasting licence for the radio programming undertaking CKYK-FM Alma in order to operate a low-power FM transmitter in Alma.

2. The new transmitter will operate at 96.3 MHz (channel 242LP) with an effective radiated power of 43 watts. The licensee indicated that the addition of the new transmitter will solve a reception problem relating to the signal of CKYK-FM.

3. The Commission did not receive any interventions in connection with this application.

4. The Department of Industry (the Department) has advised the Commission that while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.

5. The Commission reminds the licensee that pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met and that a broadcasting certificate will be issued.

6. Given that the technical parameters approved in this decision are for a low-power unprotected FM service, the Commission also reminds the licensee that it will have to select another frequency if the Department so requires.

7. The transmitter must be operational at the earliest possible date and in any event no later than 24 months from the date of this decision, unless a request for an extension of time is approved by the Commission before 29 April 2010. In order to ensure that such a request is processed in a timely manner, it should be submitted in writing at least 60 days before that date.
