Ottawa, 3 November 2010

Canadian Broadcasting Corporation

Calgary, Alberta

Application 2010-1388-8, received 18 August 2010

CBRT-TV Calgary – Licence amendment

1. The Commission **approves** the application by Canadian Broadcasting Corporation to amend the broadcasting licence for the television programming undertaking CBRT-TV Calgary in order to add a post-transition digital transmitter in Calgary (CBRT-DT). The Commission did not receive any interventions in connection with this application.
2. The new transmitter will operate on channel 21 with an average effective radiated power (ERP) of 11,800 watts (maximum ERP of 23,500 watts with an effective height of antenna above average terrain of 276.3 metres).
3. In *Revised licensing framework for over-the-air digital television services*, Broadcasting Regulatory Policy CRTC 2010-69, 10 February 2010, the Commission stated that it would not issue separate licences for digital television transmitters. Instead it would authorize the operation of digital transmitters by way of an amendment to the existing licence that would allow the simulcast of the associated service's programming on a digital transmitter. In light of the Commission's determinations set out in that policy, the Commission has considered this application as an amendment to the existing licence.
4. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department of Industry notifies the Commission that its technical requirements have been met and that a broadcasting certificate will be issued.
5. The transmitter must be operational at the earliest possible date and in any event no later than 31 August 2011. The Commission expects the licensee to inform it in writing once this transmitter is in operation.

Secretary General

**This decision is to be appended to the licence.*
