

Broadcasting Decision CRTC 2014-281

PDF version

Route reference: Part 1 applications posted on 20 December 2013

Ottawa, 28 May 2014

Golden West Broadcasting Ltd.
Estevan, Saskatchewan

Applications 2013-1750-4, 2013-1751-1 and 2013-1752-9

CJSL, CKSE-FM and CHSN-FM Estevan – Technical changes

1. The Commission **approves** the applications by Golden West Broadcasting Ltd. to change the authorized contours of the radio programming undertakings CJSL, CKSE-FM and CHSN-FM Estevan, Saskatchewan, as follows:
 - CJSL: the transmitter will be relocated and the frequency changed from 1280 to 1150 kHz; and
 - CKSE-FM and CHSN-FM: the transmitters will be relocated and their effective height above average terrain increased from 70.8 to 133.8 metres.
2. The licensee explained that the transmission site for its three stations in Estevan must be changed as it was located on top of a major coal deposit owned by SaskPower, which had asked the licensee to vacate the land so that the excavation of the deposit might continue.
3. The Commission did not receive any interventions regarding these applications.
4. The Commission reminds the licensee that pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department of Industry notifies the Commission that its technical requirements have been met and that broadcasting certificates will be issued.

Secretary General

**This decision is to be appended to each licence.*
