Reference: Part 1 application posted on 18 July 2017

Ottawa, 7 February 2018

Canadian Broadcasting Corporation
Vancouver, British Columbia

Public record for this application: 2017-0604-5

CBU Vancouver –Technical changes

1. The Commission **approves** the application by the Canadian Broadcasting Corporation (CBC) to change the authorized contours of the English-language radio programming undertaking CBU Vancouver, British Columbia, by changing the antenna pattern and decreasing the daytime and nighttime transmitter power from 50,000 to 25,000 watts. The Commission did not receive any interventions in connection with this application.
2. The CBC stated that these technical changes are required due to damages sustained by a recent fire and that they should result in a similar coverage area, as most of the Radio One AM reception in the area is duplicated by the Radio One FM signal from CBU-2-FM Vancouver.
3. The licensee added that proposed changes will ensure excellent coverage in Vancouver and the Sunshine Coast of British Columbia.
4. Pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective once the Department of Industry notifies the Commission that its technical requirements have been met and that a broadcasting certificate will be issued.
5. The licensee must implement the technical changes by no later than **7 February 2020**. To request an extension, the licensee must submit a written request to the Commission at least 60 days before that date, using the form available on the Commission's website.
