

Form 278 - Mobile and Paging Coverage and MVNOs Checklist

- An answer (“yes” or “no”) is provided for **analog and digital mobile coverage changes**.
- An answer (“yes” or “no”) is provided for **whether you operate a mobile satellite service**.
- An answer (“yes” or “no”) is provided for **GSM coverage changes**.
- An answer (“yes” or “no”) is provided for **HSPA+ coverage changes**.
- An answer (“yes” or “no”) is provided for **whether you operate a 4G or LTE mobile network**.
- An answer (“yes” or “no”) is provided for **whether you operate an LTE-A mobile network**.
- An answer (“yes” or “no”) is provided for **whether you operate a 5G network**.
- For each question (above) where you answered “yes”, a coverage map of Canada is provided.
- Any HSPA+ coverage map is a subset of the total mobile coverage.
- Any 4G or LTE map is a subset of your total mobile coverage.
- Maps are submitted in the preferred formats of MapInfo (6.5 and above) or ArcGIS.
- Only **coverage within Canada** is provided.
- Maps avoid self-intersections within shapes.
- Polygons, lines and points are each provided in their own respective layer.
- Coverage maps are not cropped near shorelines.
- Only coverage for you own network is included.
- LTE Advanced (LTE-A) network map are submitted separately (if applicable).
- 5G network maps** are submitted separately (if applicable).
- The **names of the Canadian companies**, for which you had provided mobile network services, are provided in Part C.
- An answer (“reseller” or “MVNO” or “other”) is provided in **Part C**.

- A copy of your submission has been saved in your records for future reference. DCS does not provide access to previous submissions after the collection period has closed.
